PRIMAFLORA

Primaflora Grano 8.32

Primaflora Grano is an organo-mineral fertilizer, ideally applied before seeding of autumn-winter cereals.

The high ratio of nitrogen/phosphorus present in **Primaflora Grano** allows the crops a rapid start and a good amount of nitrogen nutrition.

Primaflora Grano contains:

– sulphur: indispensable element

for the synthesis of proteins, vitamins and enzymes, directly helps and improves the qualitative yield of productions and indirectly the chlorophyll photosynthesis;

– organic substance: it employs a protective function on the nutritive elements improving its assimilability on crops.

ANALYSIS

	%
Total nitrogen (N)	8
organic	1
ammoniacal	6
ureic	1
Total phosphorus pentoxide (P₂O₅)	32
Water-soluble calcium oxide (CaO)	4
Water-soluble sulphur trioxide (SO ₃)	5
Organic carbon (C)	7.5

(kg/ha) DIRECTIONS FOR USE

	WHEAT, BARLEY, OTHER CEREALS
200-250	Pre-sowing
	MAIZE, SOYBEAN, SORGHUM, SUNFLOWER
200-350	Pre-sowing
	SUGARBEET
200-300	Pre-sowing
	TOMATO, CUCURBITS, OTHER VEGETABLES
250-350	Basic dressing
	GRASS AND FODDER CROPS
200-250	Pre-sowing
