PRIMAFLORA

Primaflora Ulivo

Primaflora Ulivo is suited to satisfy the nutritive needs of olive trees.

Primaflora Ulivo is a NPK organo-mineral fertilizer that assures a ready and progressive nutrition thanks to the nitrogen in organic, ureic and ammoniacal form characterized by the low leaching and gradual progressive availability.

Primaflora Ulivo assures the correct quantity of completely soluble phosphorus and potassium.

Primaflora Ulivo is enriched with:

- Sulphur which directly helps to improve the quality of the yield and the deposition of oil in the

drupes;

- Boron which improves the fruit setting;
- Iron which is a key component of chlorophyll;
- Zinc which helps the formation of growth regulators and intervenes in the respiratory processes of plants;
- Organic carbon: has a protective function on the nutritive elements improving its assimilability on crops.

ANALYSIS

	%
Total nitrogen (N)	14
organic	1
ammoniacal	10.5
ureic	2.5
Total phosphorus pentoxide (P₂O₅)	8
soluble in neutral ammonium citrate and water	8
water-soluble	6.5
Water-soluble potassium dioxide (K₂O)	6
Water-soluble sulphur trioxide (SO ₃)	28
Water-soluble boron (B)	0.01
Total iron (Fe)	0.5
Water-soluble zinc (Zn)	0.01
Organic carbon (C)	7.5

DIRECTIONS FOR USE

OLIVES

3-6 kg/ pianta End of winter

TOMATO, BEAN, GREEN PEA, ONION

400-700 kg/ ha Pre-sowing or transplanting

PEPPER, EGGPLANT, SQUASH, LEAF BEET, LETTUCE, CABBAGE, CARROT, FENNEL, ARTICHOKE, CUCUMBER, CELERY, POTATO, MELON, WATERMELON

800-1200 kg/ ha Pre-sowing or transplanting

PEACH, GRAPE, CITRUS, HAZELNUT, FRUIT TREES

500-700 kg/ ha End of winter
