Fruttoro Special 4.8.12

Fruttoro Special 4.8.12 is an organo-mineral NPK fertilizer, ideally used to intensify qualitative aspects. The very high quality phosphorus (SSP based) and in particular potassium (potassium sulphate) induce an active metabolism in plants. In this way a significative improvement of the levels of sugars, consistency and resistance of tissues and intensification of all the organoleptic para-

eters is achieved.

It is characterized by a low level of salinity and a high quantity of sulphur. The soluble calcium provides a precious assimilable supply, to improve the quality and shelf life of fruit. The low contents of nitrogen reduces the action of vegetative push.

Fruttoro Special is recommended on fruit trees, vegetables, flowers, legumes.

(kg/ha)

DIRECTIONS FOR USE

TOMATO, PEPPER, EGGPLANT, MELON, WATERMELON
Pre-sowing or transplanting

POTATO, SQUASH, SPINACH, ENDIVE, ONION, CABBAGE, CAULIFLOWER, ARTICHOKE, STRAWBERRY
Pre-sowing or transplanting

GREEN PEA, BEAN, LETTUCE
Pre-sowing or transplanting

SUGARBEET
Pre-sowing

TOBACCO
Pre-transplanting

PEACH, GRAPE, CITRUS, HAZELNUT, FRUIT TREES
End of winter or starting of vegetative growth
