# Triofert Speciale Olivo

**Triofert Special Olivo** is a specific fertilizer for the cultivation of olive trees.

Its formulation loyally reflects the nutritional needs expressed by the plant during the productive seasons.

So as cultivation prefers, the pushing action exercised by the nitrogen is made constant and progressive thanks to the availability

of the different forms of nitrogen which are released in differentiated times. The presence of highly soluble phosphorus, potassium and sulphur, calcium and organic carbon, completes the needs for the cultivation of olives, optimizing both the vegetative process as well as the productive one, improving the yield and the quality of the oil.

## ANALYSIS

%

<b>Total nitrogen (N)</b>	<b>12</b>
organic	1
ammoniacal	7.5
ureic	3.5
<b>Total phosphorus pentoxide (P<sub>2</sub>O<sub>5</sub>)</b>	<b>6</b>
soluble in neutral ammonium citrate and water	6
water-soluble	5
<b>Water-soluble potassium dioxide (K<sub>2</sub>O)</b>	<b>5</b>
Water-soluble calcium oxide (CaO)	6
Water-soluble sulphur trioxide (SO <sub>3</sub> )	27
Organic carbon (C)	7.5

## DIRECTIONS FOR USE

### OLIVES

3-6 kg/ plant      End of winter or starting of vegetative growth
