# Superphos granulare

**Superphos granulare** is a phosphatic fertilizer in granular form which favours uniform distribution with whatever fertilizing method used.

The product is widely used in vegetables, fruit trees and different crops. Its high contents of

sulphur and pH acidity make it particularly suitable for all soils in which the availability of phosphorus is critical. The soluble calcium and the micro-nutrients present enrich the existing nutritives of this irreplaceable phosphatic fertilizer.

## ANALYSIS %

Phosphorus pentoxide (P <sub>2</sub> O <sub>5</sub> ) soluble in neutral ammonium citrate	19
water-soluble	17.7
Water-soluble calcium oxide (CaO)	22
Water-soluble sulphur trioxide (SO <sub>3</sub> )	25
