Nutrinatura N10

Nutrinatura N10 is an organic nitrogen fertilizer. The organic nitrogen is released in a slow natural way, suitable for vegetables and fruit trees.

The organic nitrogen is released in a balanced way reducing leaching loss. In this way, it favours a balanced development throughout the vegetative and productive cycle.

Nutrinatura N10 helps the development and the activity of micro-organisms improving the physical, chemical and biological fertility of the soil and helps to re-establish natural balance. Its constant use in time helps to maintain organic substances in the soil.

ANALYSIS		%
Azoto (N) organic	10	
Organic carbon (C)	37	

(kg/ha) DIRECTIONS FOR USE

500-800	KIWI
700-1000	STONE-FRUIT, APPLE TREES, PEAR TREES
