# Basic Power

Biological activator of growth  
Vegetal amino acids

- High concentration of bio-stimulating amino acids
- Fast and effective
- Selective cultures

**Basic Power** is a vegetal stimulant, extremely rich in bio-stimulating amino acids with a low molecular weight and polysaccharides.

The innovative formulation and the particular selectivity of the cultures make **Basic Power** a product with a high technical profile and biological effectiveness.

The product is quickly absorbed

and, in a few hours, it is ready to stimulate metabolic process of the plant. The use of the product is recommended during the most important periods of the plant development and of its major energy requests (transplant, bloom, setting fruit and enlargement of fruit).

## ANALYSIS

%

<b>Total aminoacids</b>	<b>42,6</b>	w/w (=520 g/l)
<b>Free aminoacids</b>	<b>15</b>	w/w (= 183 g/l)
<b>Total nitrogen (N)</b>	<b>7,6</b>	w/w (= 92,7 g/l)
<b>Water-soluble organic nitrogen (N)</b>	<b>7,6</b>	w/w (= 92,7 g/l)
<b>Organic carbon (C)</b>	<b>21</b>	w/w (= 256 g/l)

## DIRECTIONS FOR USE

### FOLIAR SPRAY

#### FRUIT TREES

300 g/hl (260 ml/hl) Every 10-15 days starting from pre-flowering

#### VEGETABLES

##### *Field growing*

*Greenhouse:* each 10-15 days starting from post transplanted period

#### PROCESSED CROPS

#### CEREALS

Tank-mix with post-emergence herbicides or fungicides

3 kg/ha (2.6 l/ha)  
150-200 g/hl (130-170 ml/hl)  
3 kg/ha (2.6 l/ha)

1-1.5 kg/ha (0.9-1.3 l/ha)
