# Azotor

Fluid organic nitrogen

**Azotor** is a fluid mixture of organic nitrogen fertilizers. The innovative formulation allows an ample use the most disparate fields of application. **Azotor**, being produced with select organic molecules it is rich of all the substances needed to a balanced organic plant nutrition.

**Azotor** is suited both for leaf and radical applications.

It can be used in tank-mix with the most common fertilizers and pesticides. However, we recommend to make some small test of mixing, before the definitive application.

## ANALYSIS

	%	
<b>Nitrogen (N) total</b>	<b>8</b>	w/w (=92 g/l)
Organic nitrogen (N)	8	w/w (=92 g/l)
Organic carbon (C)	15.5	w/w (=178 g/l)

## DIRECTIONS FOR USE

### FERTIGATION

60-80 kg/ha (50-70 lt/ha) Beginning of vegetative growth, post fruit-setting

### FOLIAR SPRAY

#### FRUIT TREES

300-350 g/hl (250-300 ml/hl) Every 15-20 days starting from budding

#### VEGETABLES

250-300 g/hl (200-250 ml/hl) Every 15-20 days after transplanting

#### PROCESSED CROPS

3-4 kg/ha (2.5-3.5 lt/ha) Tank-mix with post-emergence herbicides or fungicides
