# Flexil Quality

Improves production quality

- Favours the formulation of sugars
- Increases colour, consistancy and conservability of fruit
- Increases plant resistance

**Flexil Quality** is a foliar fertilizer purposely studied to improve production quality. Thanks to its high contents of potassium, it favours the formation of sugars, intensifies colour, consistency and

conservability of fruit.

The presence of chelate micro-nutrients prevents nutritional imbalances.

**Flexil Quality** is totally soluble and rapidly absorbed by leaves.
