Flexil LQ

Liquid fertilizer
Balanced formula

- Specific fertilizer for foliar application, with NPK balanced ratio
- Stimulates productive-vegetal development
- Guarantees rapid integration of nutritive elements and micro-nutrients

Flexil LQ is a specific fertilizer for foliar application with a balanced NPK ratio. It stimulates the productive-vegetal development and can be applied during the whole cycle of development, in particular when plants need rapid inte-

gration of nutritive elements. The presence of chelate micro-nutrients prevents nutritional imbalances.

Flexil LQ is totally soluble and rapidly absorbed by leaves.

ANALYSIS

	%
Total nitrogen (N)	10 w/w (= 122 g/l)
ureic	10 w/w (= 122 g/l)
Water-soluble phosphorus pentoxide (P₂O₅)	6 w/w (= 73,2 g/l)
Water-soluble potassium dioxide (K₂O)	8 w/w (= 97,6 g/l)

Boron (B) 0.05%; Iron (Fe) EDTA 0.2%; Molybdenum (Mo) 0.005%;
